PROFESSIONAL SUMMARY

Product-minded Software Engineer specializing in architecting resilient mobile and web systems. Proven track record of scaling applications to 700K+ users and bridging the gap between complex business requirements and technical implementation.

NOTABLE PROJECTS

Yoy Media

yoymedia.com.my

- Designed and developed a digital agency platform focused on immersive web experiences and brand identity.

PROFESSIONAL EXPERIENCE

Software Engineer (Contract)

May 2025 - Present

POS Malaysia

- Involved in planning, architecting and developing full-stack logistics solutions for public sector clients
- Leading the development of critical payment modules for the flagship Pos Mobile App, ensuring secure, nationwide transaction processing.
- Bridging the gap between legacy workflows and modern mobile-first solutions by collaborating directly with stakeholders to identify and resolve operational bottlenecks.
- Implementing data-driven insights through analytics and production monitoring to optimize system performance and reliability.

Software Engineer (Founding Team Member)

Mar 2023 - May 2025

Lumi News Malaysia

- Owned the full product lifecycle for a high-traffic media platform (700K+ downloads), moving from initial architectural design to deployment and post-launch optimization.
- Engineered a high-performance content rendering engine capable of handling complex HTML injections, social media embeds, and in-article search with sub-second latency.
- Established the company's observability stack, building production monitoring and logging infrastructure that reduced issue detection time by 50% in a fast-paced environment.
- Built cross-platform engagement features, including native home screen widgets using Swift (WidgetKit) and Kotlin (Jetpack Glance), directly driving daily active user growth.

Software Engineer (Staff Augmentation)

Feb 2022 - Feb 2023

Snappymob

- Contributed to the MyAstro Super App ecosystem, focusing on scalable reward systems and high-reliability deep-linking infrastructure.
- Improved codebase maintainability by troubleshooting and refactoring legacy modules, implementing robust unit testing patterns and comprehensive documentation.
- Collaborated in a high-velocity agile environment to deliver feature-parity across complex enterprise mobile systems.

Software Engineer

Jul 2021 - Feb 2022

Artisan IT Solutions

- Designed and implemented an optimized relational SQLite schema to handle complex offline-first data synchronization for healthcare field-work management.
- Developed a full-cycle inventory monitoring system, focusing on data integrity and reliable performance in low-connectivity environments.

Software Engineer Intern

Dec 2020 - Feb 2021

Fehux

- Diagnosed and resolved critical production bugs for a React Native live-streaming platform.
- Contributed to the development of interactive shopping features during high-traffic promotional events.

CORE TECHNICAL STACK

- **Frontend/Mobile:** Flutter (MVVM Architecture), Next.js, React Native, Swift (SwiftUI), Kotlin (Compose)
- **Backend/Data:** Node.js, PostgreSQL, SQLite GraphQL, gRPC, Golang
- **Infrastructure/AI:** Docker, Firebase, BigQuery, Agentic AI (LangChain/LangGraph/MCP), Production Monitoring & Observability
